

5 Questions to Ask Before You Sign a Concrete Quote in Fargo

Don't get surprised halfway through your project. Ask every contractor these five questions before you sign anything.

1

Is old concrete removal included in this price?

Tear-out and haul-away is a real cost. If it isn't in writing, expect a change order later.

☐ Yes ☐ No ☐ Not mentioned — ask directly

2

Is the base being checked and corrected before the pour?

Fargo's freeze-thaw cycle damages what's under the slab, not just the slab itself. Skipping this step is the #1 reason driveways crack again within a few years.

☐ Yes ☐ No ☐ Not mentioned — ask directly

3

Is rebar or wire mesh reinforcement included?

Reinforcement is standard for North Dakota winters. If it's not in the quote, it's not a real Fargo-ready driveway.

☐ Yes ☐ No ☐ Not mentioned — ask directly

4

Are permit fees included or separate?

Some Fargo and West Fargo projects require permits. A quote that "forgets" this often comes back as a surprise invoice later.

☐ Included ☐ Separate ☐ Not mentioned — ask directly

5

What's the cure time before I can drive on it?

Rushed curing means early cracking. A contractor who can't give you a clear answer hasn't thought your project through.

☐ Clear answer given ☐ Vague answer — red flag

THE RULE OF THUMB

If a quote comes in 30%+ below everyone else's, one of these five items is missing. Find out which one before you sign.

READY FOR A REAL NUMBER?

Every driveway is different. The fastest way to get an accurate number is a free on-site visit.
